Dear Educator,

We now have new PULSE@Parkes (http://outreach.atnf.csiro.au/education/pulseatparkes/) observing slots available for the October 2010 - March 2011 Parkes semester. Dates available are:

22 October 2010
9 November 2010
7 February 2011
16 February 2011

The slot on December 14 has already been allocated for a special event, more details to follow. There is no slot for March next year as the Parkes radio telescope will be shut down for extensive maintenance for a few weeks that month.

The program is free to schools. Sessions usually last from 10.30am to 1.15pm here at CSIRO Astronomy and Space Science headquarters at Marsfield in Sydney with a visit to your school by a team member ahead of your observing run.

Applications can be made online at:

Please contact me if you would like to learn more about the project or discuss details.

PULSE@Parkes is also mentioned in an interesting article about the search for gravitational waves in today's Sydney Morning Herald (page 4):
PULSE@Parkes Project Scientist Dr George Hobbs is interviewed in the article.

Apologies if you receive this email more than once.

Regards

Rob Hollow
